Process outsourcing

We comprehensively support companies in diagnosing and solving quality problems.

We offer:

- Quality support
- Production support
- Logistics support
- Rework
- Sorting
- Cross-border temporary employment

QWall®

QWall is a system on which QSense bases all it's operational activities. It ensures integrity in quality processes.

It is a shield in the fight against incompatibilities.

QLearn®

QLearn is a virtual reality employee training system for quality control and quality awareness among individuals in our organisation and in customers' organisations.

Our approach

We are driven by and united by passion, responsibility and determination to solve our clients' problems.

450+ Projects completed

> "
>
> *At QSense, we believe that our quality control, production support and logistics services deliver value to customers beyond the temporary need.*
>
> Andrzej P. Kublik | CEO

Our systems

Depending on the client's needs, we supplement the inspection process with dedicated software components.
